

G-tag - designed to be found!

Search, check and find lost objects

It's easy to misplace, forget or lose your valuable possessions which can lead to time lost trying to find them and a potential financial loss replacing them. The G-tag from Gigaset can solve this problem. G-tag is a new innovative product with paging, alarm and reminder functions, which permanently connects your mobile device with your valuable possessions.

Tag your valuable possessions

What is G-tag?

G-tag is a Gigaset invention that allows you to see where your important possessions are and then helps you retrieve them if they are lost. Download the free companion app for iOS and Android, register, then attach your G-tag to an object, for example, your car keys. Your smartphone or tablet then shows you how far away the object is and warns you if its too far away, a map of the last known location with optional directions is also provided. G-tag connects permanently to your device via Bluetooth, you can connect up to 8 G-tags on your smartphone.

Scale 1:1

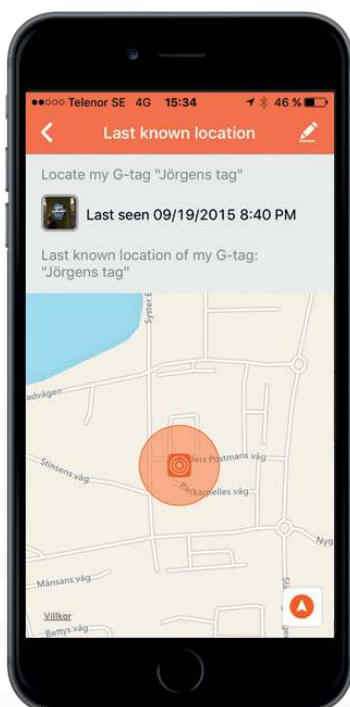

G-tag permanently connected to your mobile device

NEW app update provides the user with new features to help search for lost objects.

The map shows how you moved from your G-tag

Improved location accuracy

Clear symbol shows whether your G-tag is nearby
